

IPA Proposal for the creation of a new system.  
04.06.24

**"You never change things by fighting the existing reality. To change something, build a new model that makes the existing model obsolete."**

**- Buckminster Fuller**

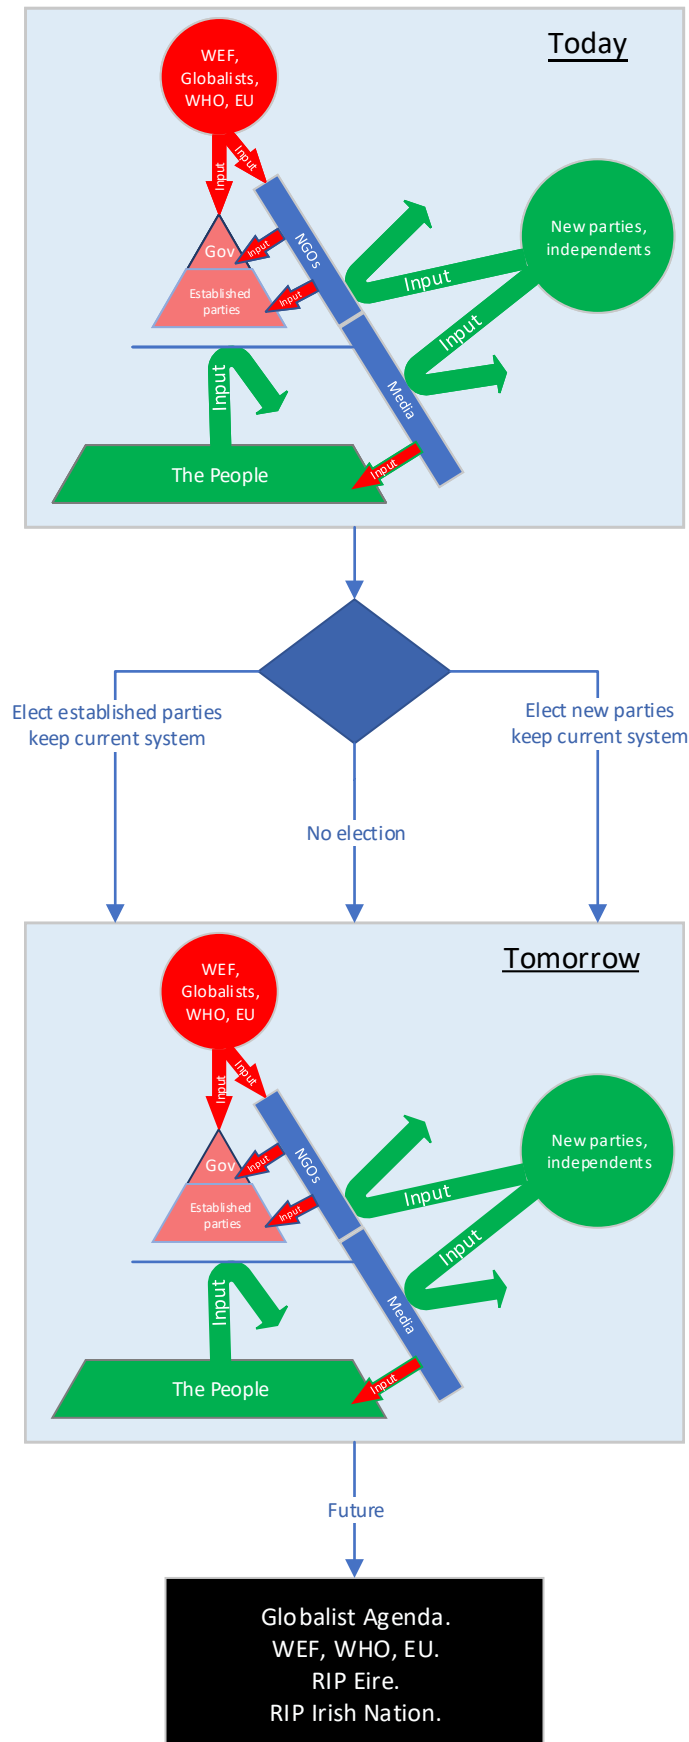

## Ireland today

- Pyramidal structure.
- Power concentrated exclusively at the top.
- We the People, sovereign, disconnected completely from the top.
- Top of pyramid taking instructions, openly, from outside entities.
- Top of pyramid openly, demonstrably, hostile to Irish interests.
- Top of pyramid consistently, treasonously, defrauding from, discriminating against, causing harm to The Irish People, over decades now.
- Elections ineffective to change course: agenda is embedded in system, irrespective of personnel.
- Outside hostile interests using NGO structure (30,000 + entities) and captured media to create and manipulate inorganic public opinion.
- Harmful and disastrous policy created based on created opinion: 'The Narrative'
- All established media working in tandem to manage the narrative.
- Opposing voices, candidates, parties, smeared with false labels to demonise and exclude from the discussion.
- Media, NGOs and Government operating 'gas-lighting' operation on We The People.

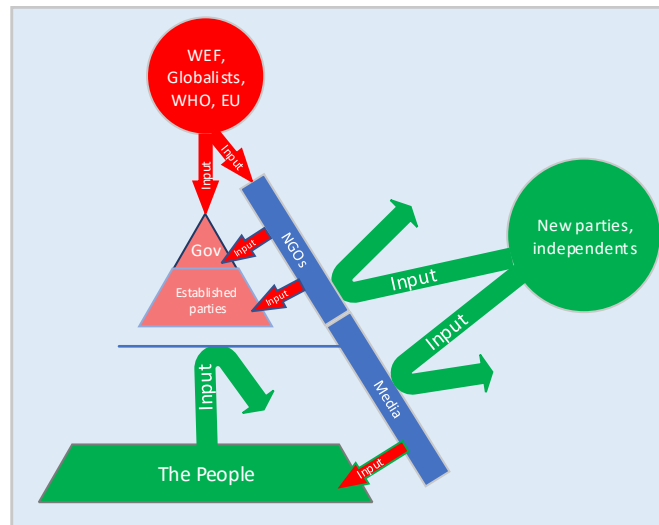

This situation cannot be fixed without changing the system of government. Changes which do not include the creation of a new system from a blank canvas are guaranteed to fail over time and revert to the current situation.

### Option A: Keep current system

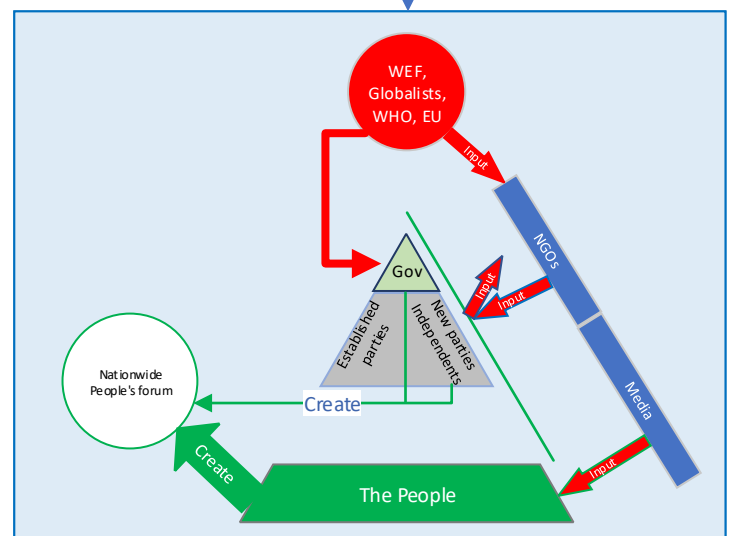

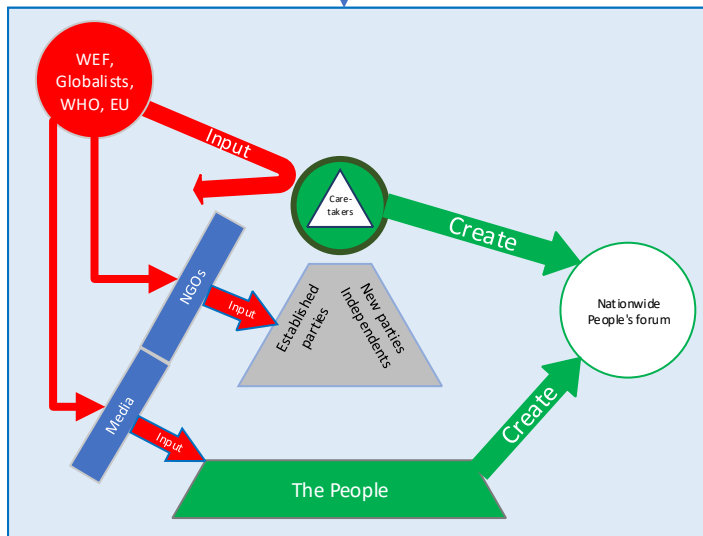

## Option B: Change system

No election.  
Gov step down.  
Caretakers + freeze

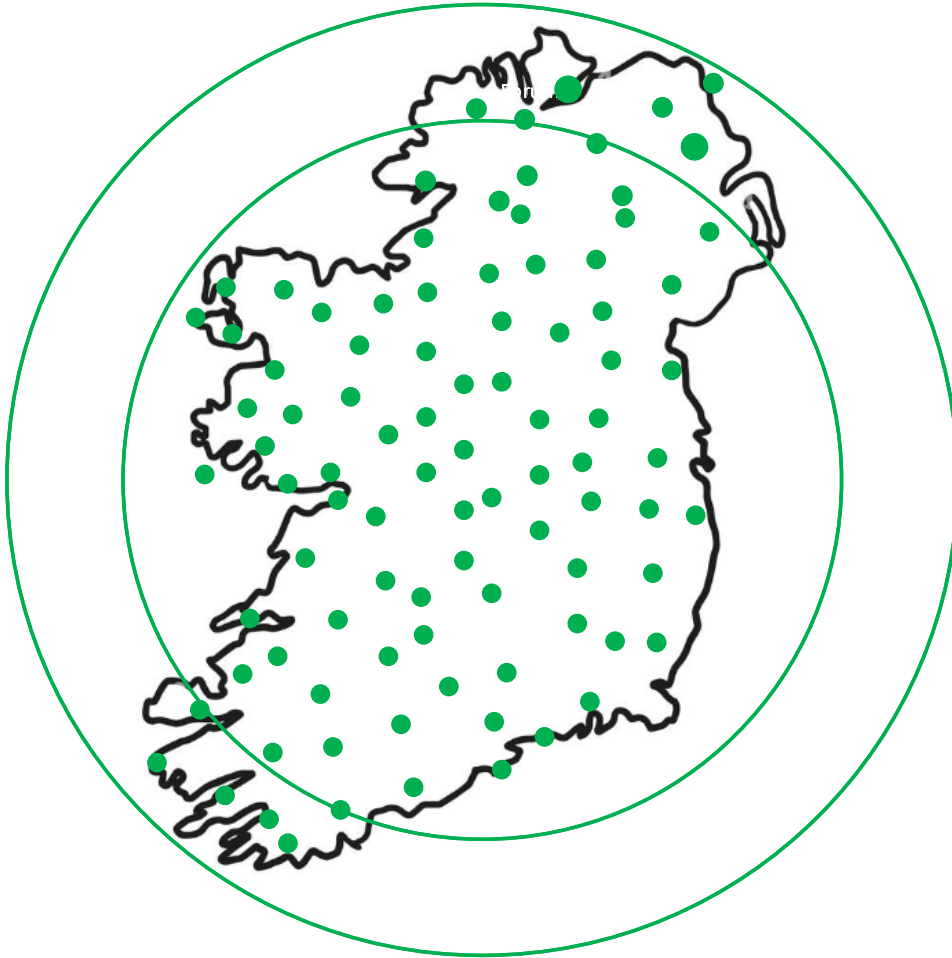

Election.  
Agreement of candidates  
to create People's Forum  
to create new system.

- Public pressure causes Government to step down.
- Caretaker group of current elected reps pause Gov.
- No treaties or new laws during pause.
- Immigration policy addressed and law enforced.
- Nationwide People's Forum created.
- Public to assess situation, create prioritised list, design new system.
- Proposals to tackle immediate issues to be discussed on their merit in the open via the forum.
- General election to be called within 12 months.
- Switch to new system to be made as the situation requires.

- Newly elected representatives do what they currently intend to do plus create a nationwide People's Forum.
- Public to assess situation, create prioritised list, design new system.
- Proposals to tackle immediate issues to be discussed on their merit in the open via the forum.
- General election to be called as determined via the forum.
- Switch to new system to be made as the situation requires.

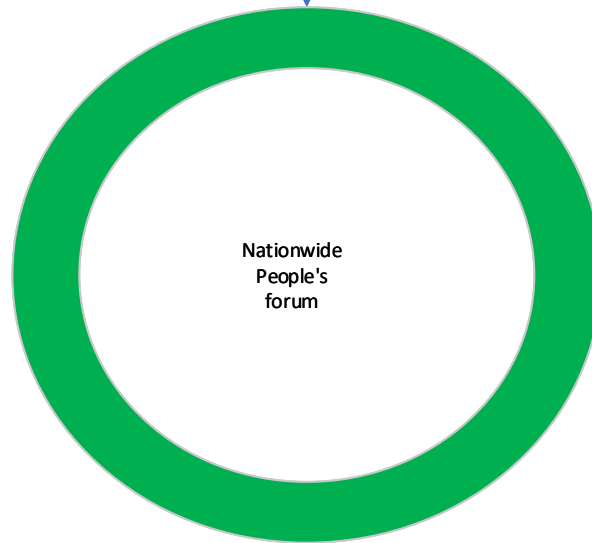

## The People's Forum

- Ongoing conversations in every community.
- Topic of discussion : What is the best possible future?
- Circular, no committees, no voting, equal, open, peaceful, thorough, truthful.
- Open to all individuals. Not to groups.
- Hosted by facilitators to guide the conversations and let all be heard.
- Information captured by scribes who then compile The List on a website, transparently.
- Warm, comfortable, local venues with refreshments.
- Funded by the state/participants/other as possible, transparently.
- All ideas, suggestions, issues, enter the official national discourse via the forum.
- Ideas progress on merit: good ideas, assessed properly, desired by The Nation, will progress, and vice versa.
- People progress on merit. Individuals with vision, ability, quality of character, will emerge and become known to The Nation via the process.
- Power, Sovereignty, decision making remains always in The People, expressed, assessed, and manifested through the Forum.
- What emerges is a ground-up, self-generating, robust, future-proof, self-correcting Meritocracy, directed always towards the best possible future for The Nation, with politicians engineered permanently out of the system.

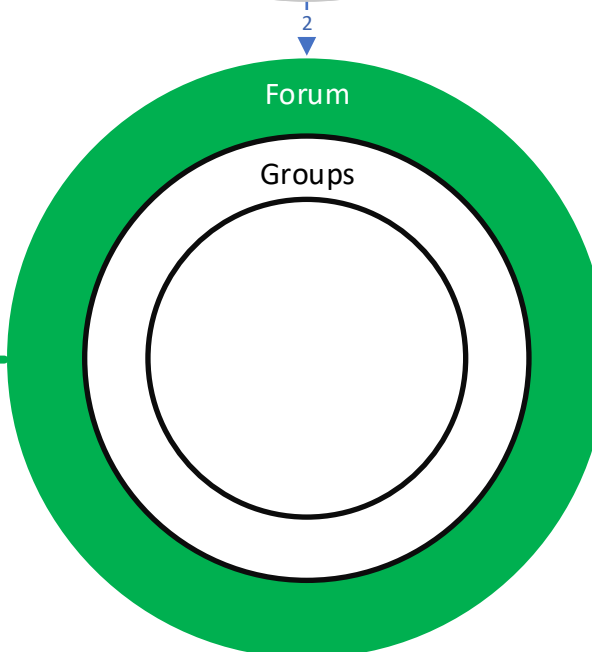

**Steps:**

- 1: Create Forum
- 2: Create List.
3. Form groups.
4. Build new system.

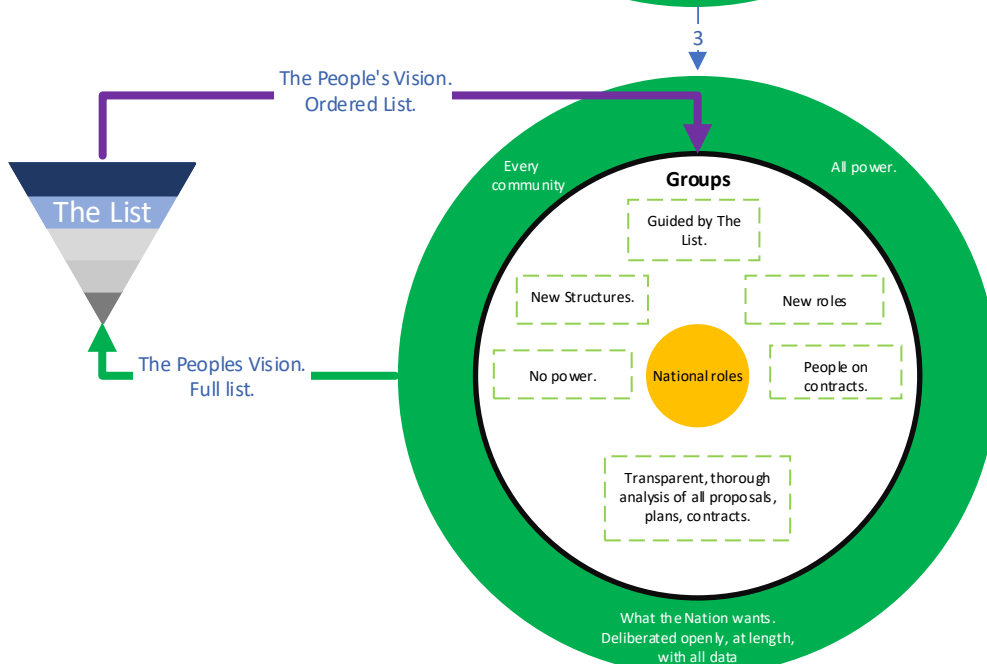

**The Peoples Forum**

- Conversations, nationwide, open to all individuals.
- Circular, simple, no committees, no voting.
- Objective to define the best possible future.
- Assemble a list of what that consists of.
- Starting with a blank canvas.

**The List**

- Generate a list of priorities, aspirations, needs.
- Order the list by most topical, top to bottom.
- People form groups around The List based on their interests and skills.
- Address the topics as necessary.
- Assess and redesign our way of life by organising around what we actually want.

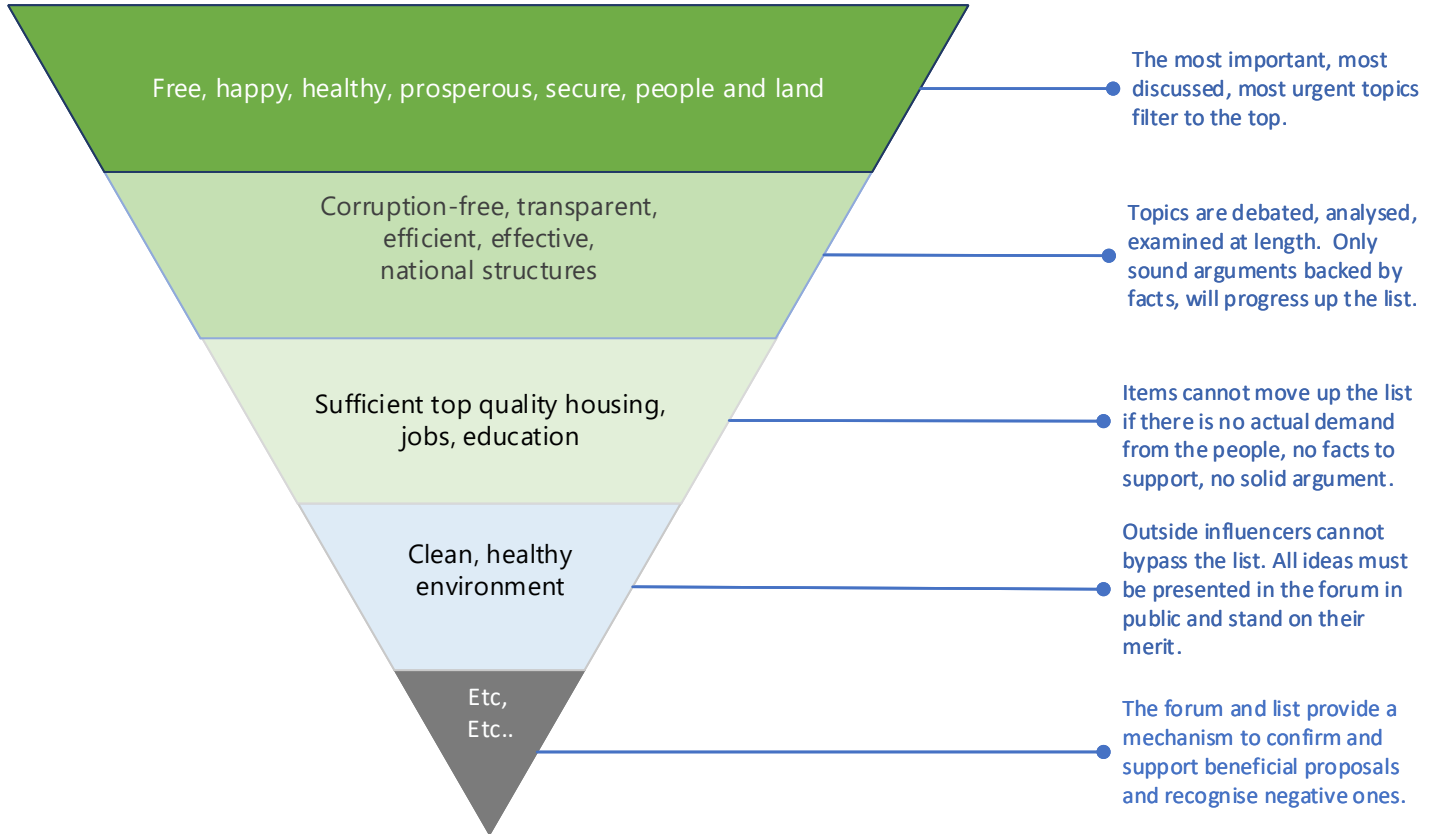

**New System**

- Redefine who we are , where we are going.
- Design and build new system based on this.
- Meritocratic contracted roles instead of politicians.
- Performance-based, suitably-rewarded, transparent, no power.
- Retain all power in the People, operating via the forum.
- Entry point of ideas and proposals is through the forum.
- Ideas progress on merit, in the open, through the forum.

## The List

The list is what we the people want for our lives, discussed deeply and openly in the forum, compiled on a website, ordered by the priority we the people have given it.

(The items listed below are examples to demonstrate how The List would operate, not the actual list)

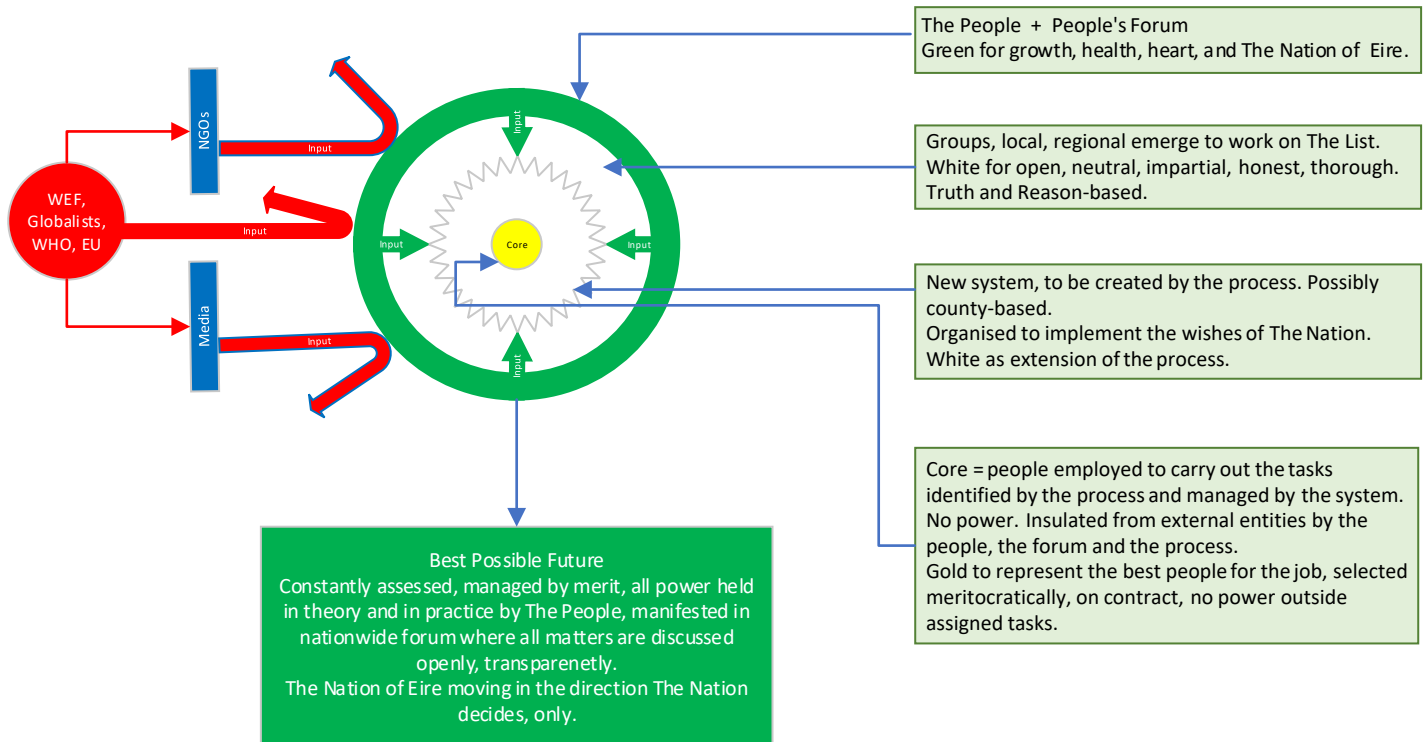

Power resides in The People, expressed via the forum and The List in a structured, self-governed, decentralised manner.

Process becomes a self-generating meritocracy, built from the ground up.

- Inverted Pyramid structure.
- Most important topics filter to the top.
- Presented as an interactive graphic on a website.
- Compiled from the content of the ongoing Forum discussions.
- The priorities of The Nation at-a glance, details accessible by clicking into graphic.
- Forum becomes location for discussion and decision making on all matters of interest to The Nation.
- The List becomes the summary of the discourse, clear picture of the current situation and plan for the future.
- The List is the people's manifesto. Will make political party manifestos irrelevant.
- Participants in the forum self-organise to address each topic as necessary.

The List will be The Nation of Eire's 'vision board'. Where we want to go and why, properly thought through. Individuals and groups will form to realise the vision and through the forum We The People will award contracts for their services, rewarding success and punishing failure, like every other job.

## A possible New System

- We the People + Forum, outer ring, green, is the main component.
- Space inside green ring, white, represents future structures and processes. To be identified and designed via the Forum.
- Jagged inner ring, white, represents a possible arrangement of 32 interlocking county organisations, created by the forum to manage most things.
- Core circle, gold, represents a possible core of meritocratically identified individuals contracted to carry out tasks at national level, or similar large tasks which sub-groups cannot manage.
- Rebounding red inputs from outside actors represent the future inability of said actors to recreate the current situation. They can only influence through good ideas well presented and thoroughly assessed in every way by the Forum, i.e. The People, in the open.

<b>Current system</b>	<b>Change to</b>	<b>New system</b>
<b>Pyramid structure.</b>  Designed to be controlled from the top.		<b>Circular structure.</b>  Designed to be impossible to take control of.
<b>A small group rules.</b>  The population takes practically no part.		<b>Maximum Participation.</b>  Entire nation can take part on an ongoing basis.
<b>Ruling group corrupt.</b>  Ruling group lobbied and influenced by, then directed by, then controlled by outside actors for their benefit, to the people's detriment.		<b>No ruling group.</b>  Politicians replaced by state employees contracted on merit to carry out the tasks emerging from the forum.
<b>Dishonest public debate.</b>  Discussion and analysis of issues in the national arena are controlled, limited, manipulated, dishonest.		<b>Honest public debate.</b>  Fully open discussion, maximise participation, maximise reach, explore all issues, no sacred cows.
<b>System designed around parties.</b>  The direction of the country is completely unrelated to the wishes of the people, and often directly against them.		<b>System designed around 'The List'.</b>  The collected vision of the best possible future is what drives The Nation. No party manifestos, no election promises, no programs for government.
<b>Centralised.</b>  Power, decision making, concentrated in one group in one area.		<b>De-centralised.</b>  Power resides in The People. Decision making takes place in the Forum. No centralised group with power.
<b>Unappealing to most people.</b>  Deliberately dull, grey, hostile. Concerned with self-preservation of those within. Repels people of character and ability.		<b>Appealing, exciting.</b>  The life of a Nation aiming towards its collective Vision, its potential ripe, its horizons wide, its lands rich, is limitless. There is no reason a role in the new system should not be the most sought-after job in the land, attracting the best of our people.

Ireland is not a democracy, nor a constitutional republic as it is actually supposed to be. Whatever the label, in reality it is an emerging totalitarian regime, with all the usual characteristics of such regimes, plus some additional new ones.

This is not, and will not be, acceptable. If we The Irish people do not rectify this immediately then there will be no more we The Irish People, or Ireland. We are in an existential crisis.

The system the country is run by produces this result. There are changes to the personnel in the system every five years but the direction we move in does not change. Clearly therefore another change of personnel without a change of system will ultimately see us continue on the same course after a period of time has passed. We need a new system, we all know this.

We The People of Ireland are Sovereign. It is written clearly in our proclamation of independence. And even if it were not, it is seared into our souls, as a fact of existence. It is written in blood across our land, across thousands of years. We are Sovereign. We are free. We are the Nation of Eire, a people with long roots, long memories.

We are the enemy of no people, the conquerors of no nation. We make music, literature, humour, plays, not war. We are the friends of the downtrodden, the sponsors of charity. We have our flaws, but they cause harm only to ourselves. In reality our main flaw is that we are too nice, too trusting, too naïve, and this has allowed us be moved to the position we find ourselves today.

We have been attacked and plundered for as long as any nation and longer than most. Now we are under attack again, and if we lose this time we have lost, it will be over. So we cannot lose.

What little we have, our land, our peace, our future, is ours to hold and protect for our children. It is ours, and we owe it to no one. We owe no one an apology or bended knee. We have no claim against us.

As sovereign people, and as it states in our constitution, we have the right to choose our form of governance. WE are in charge of this country, not our elected employees.

The current form of governance is self-evidently a bad design with disastrous back-doors and opportunity for bad actors to corrupt it and take it over. This model must be retired, we must upgrade to survive.

We must seize this opportunity to properly, collectively examine who we are, where we are, where we came from, and where we are going, and then take our destiny into our own hands and make our own way into the future.

This proposal from the IPA is to suggest a way to create a new system. We all know that one is necessary, that it should be decentralised, that we need some way to solve the problem of politicians and influence, that the people's wishes need to be what the nation is aimed towards.

We need solutions to the financial question, alternative currencies and methods of trading, public banking, a dual financial system. We need solutions to housing, food, industry, education, health.

The IPA, in common with groups all over the country, are working to develop these solutions. People of great ability and vision have ideas for a much better way of life. These need to be brought to a wider audience and developed into actual plans via discussion and collaboration with the people of Ireland. This is why we need a nationwide forum. In the forum we can connect the ideas to the means, put together a full set of solutions to the issues we face, reach agreement on the best way forward, and do it.

The IPA do not ask you to stop anything you or your group is doing or intends to do, and is not seeking any control of any type.

The suggestion is that with or without an election, with or without financial support from a new government, a nationwide People's Forum is formed, for the purpose of creating a new system for the management of The Nation of Eire.
